

WAKEFIELD PARK

includes internal park trails as well as trails on the countywide trail plan. One section is a component of the Cross County Trail which will eventually stretch across the county from south to north. It will link the Occoquan River in the south to the Potomac River at Great Falls National Park. The trail will run through the Laurel Hill Greenway and the Pohick Creek, Accotink Creek and Difficult Run Stream Valleys. The CCT through Wakefield Park is level, but has a variety of surfaces - asphalt, stonedust, and natural surface. There are also

several ditch crossings. The approximate length of the CCT through the park is 1.8 miles.

Also within the 292 acre park are numerous single-track trails that are used by mountain bikers, joggers, and walkers. Within the park are ballfields, tennis courts, playgrounds, a RECenter, and other park facilities. Restrooms, vending machines, and water fountains are located at the ballfields. Parking is available within the park, as shown on the map.
